

INO C-927-R + RX Stripping and Twisting Machine

09/2010

Needs precision cable stripper for various insulation materials of the wire which for produce and require for more small and compact of the electronics devices and for communication equipments. **INO C-927** has designed and developed reliable stripping varied insulation materials of micro-cable. From conductor diameter 0,1 mm (AWG 36) up to 3,5 mm (AWG 10). Stripping diameter display can be set to within 0,01 mm increments. his optimal stripping quality is guaranteed damage to the conductor is eliminated.

For the new century. Ultramodern Technology had been created and developed the micro cable stripping precision machine.

- *For most different kinds cables, to be optimized in order to maximize stripping quality*
- *Can be selected twist with CW/CCW or non twist*
- *World wide use supply voltage AC100V to 240V*
- *Digital display for stripping diameter*
- *Stripping in difficulties peculiar insulation materials*
- *Can be set wide variant function*
- *Compact, Light weight, Desk top*

Specification

	INO C-927-R	INO C-927-RX
Number of blades	2	4
Wire Sizes	0,01 - 6,0 mm ² / AWG 36-10	
Wire Insulation Diameter	up to 3,5 mm	
Strip Length	1,0 - 25 mm	
Infeed-Length	approx. 15 mm + Striping Length	
Semi Strip	min. 2 mm	
Cycle Time	max. 1,5 sec. - adustable - max. 1,2 sec.	
Power Supply	100 - 240V / 45VA	
Dimensions	380 x 130 x 195 mm	
Weight	8 kg
